Department: Architecture Engineering

Course title: Architectural Drawing
and Presentation (0908225)

Prerequisite: Architectural Drawing (0908000)
Instructor:
Lecture's time:
Semester:

Office Hours:

Course description:
This course develops the student's skills in presenting architectural drawings and masses. It focuses on methods of perspective drawings - one and two vanishing points- through a series of exercises for drawing the interiors and the exteriors of buildings, studying shade and shadow and implementing them on plans and 3D masses using the graphic drawing tools.

Aims of the course:
This course develops the student's skills in presenting architectural drawings and masses.

Intended Learning Outcomes (ILOs):
1. **Knowledge skills: with ability to Know the** methods of perspective drawings and shade and shadows.
2. **Understanding skills: with ability to understand** the fundamentals of perspective and shadows.

Course structures:

Week	C. Hrs	ILOs	Topics	Teaching Procedure	Assessment methods
1week	6.hrs	1	- Introduction: Course outline (syllabus) - Identify the fundamentals of shade and shadows	Studio	
6 weeks	36.hrs	1,2	- How to draw shade and shadows on (plans , elevations, site plans)	Studio	
1 week	6.hrs	1,2	- Identify the fundamentals of perspective Drawing	Studio	
2 weeks	12.hrs	1,2	- One point - perspective	Studio	
2 weeks	12.hrs	1,2	- Tow point - perspective	Studio	
2 weeks	12.hrs	1,2	- How to draw shade and	Studio	

			shadows on perspective
