Faculty of Educational Sciences

Brochure

About the Faculty:

The Faculty of Educational Sciences was established at Zarqa University with the establishment of Zarqa University in 1994, due to the importance of the College of Educational Sciences and its prominent role in building the scientifically, technically and technologically qualified human being to be effective in his society and whose vision expand to include all humanity without narrow limits That is why the college was one of the first colleges to grant a bachelor's degree in the following majors:

- Classroom Teacher.
- Library and Information Science.
- Early Childhood.

A practical education program was established in the Faculty at the beginning of the 2002/2003 academic year. Based on the university's conviction that practical education occupies a prominent place in the curricula for teacher preparation and learning.

Faculty Vision:

Pioneering and excellence to become internationally recognized among counterpart faculties

Faculty Mission:

Promoting and developing the college programs to reflect the new international trends in educational sciences, the library and Information science and connecting these issues with the labor market and the comprehensive development plans in Jordan, in addition to encouraging scientific research and society services.

Faculty Goals:

The faculty exerts all possible efforts to achieve the following goals:

- 1.Preparing students academically, technically, and technologically to enable them to carry out adequately their assigned duties in the future
- 2.Building the universal student character open on all other societies and cultures.

3.Building a comprehensive student's character, that is scientifically, socially and psychologically aware of its responsibilities and duties.

4.Encouraging scientific research among teaching staff and students.

5.Continuous cooperation with the local community and its establishments to achieve the comprehensive and continuous growth and development.
