Third: Course Description

This course provides an integrative approach to research methodologies, particularly suited for postgraduate studies in computer science and related fields. The course focuses on understanding and applying research philosophies and methodologies, effective proposal and report writing, and essential data collection and analysis skills. It uniquely blends traditional research approaches with innovative techniques, preparing students for successful academic and professional research endeavors in the evolving landscape of trending technology.

Fourth: Course Objectives

1. Understand Research Fundamentals: Build a foundational knowledge of research principles and methodologies relevant to computer science, information systems, and cybersecurity.
2. Develop Proposal and Report Writing Skills: Gain proficiency in writing research proposals and reports, focusing on clarity, structure, and relevance.
3. Master Literature Review Techniques: Learn to conduct in-depth literature reviews, critically analyzing existing research and identifying key gaps and trends.
4. Master Data Collection and Analysis Techniques: Acquire practical skills in collecting and analyzing data, using both traditional and modern tools and techniques relevant to the technology sector.
5. Understand Research Ethics and Compliance: Grasp the ethical considerations and compliance requirements in conducting research in tech-related fields.
6. Develop Proposal and Report Writing Proficiency: Gain expertise in formulating clear and concise research proposals and reports, essential for academic and professional success.

Fifth: Learning Outcomes

| <i>Level descriptor according to (JNQF)</i> | <i>CILOs Code</i> | <i>CILOs</i> If any CLO will not be assessed in the course, mark NA. | <i>Associated PILOs Code</i> Choose one PILO for each CILO* | <i>Assessment method</i> Choose at least two methods |
|---|-------------------|--|--|---|
| Knowledge | K1 | Understand advanced research methodologies specific to computer science, information systems, and cybersecurity. | PK2 | <ul style="list-style-type: none"> • Assignments • quizzes • Research proposal • Final Exam |
| | K2 | Grasp the ethical and legal aspects of conducting technology research. | PK1 | <ul style="list-style-type: none"> • Assignments • quizzes • Research proposal • Final Exam |
| | K3 | Ability to conduct research thorough and critical literature reviews. | PK3 | <ul style="list-style-type: none"> • Assignments • quizzes • Research proposal • Final Exam |
| | K4 | Acquire knowledge of various data analysis techniques suitable for technology research. | PK4 | <ul style="list-style-type: none"> • Assignments • quizzes • Research proposal • Final Exam |
| Skills | S1 | Develop the ability to design a comprehensive research proposal, effectively utilizing techniques like the funnel strategy and mind mapping. | PS5 | <ul style="list-style-type: none"> • Assignments • quizzes • Research proposal • Final Exam |
| | S2 | Acquire skills in foundational research writing, including constructing a literature review and developing an analytical framework. | PS2 | <ul style="list-style-type: none"> • Assignments • quizzes • Research proposal • Final Exam |

Ninth: Course Policies

- All course policies are applied to all teaching patterns (online, blended, and face-to-face Learning) as follows:
 - a. Punctuality.
 - b. Participation and interaction.
 - c. Attendance and exams.
- Academic integrity: (cheating and plagiarism are prohibited).
